PROFESSIONAL EXPERIENCE

Devmountain | Lehi, UT (Remote)   *October 2023 - March 2024*
Web Developer / Software Engineer (student)

Foundations Project (Anime Go) - Github Repo

JavaScript | NodeJS | Express | Axios | API
- App allows users to search for their favorite anime titles, providing detailed information such as synopsis, rating, and much more
- Browse through an elegantly designed UI styled with CSS
- Users can create a personalized watchlist where they can add and remove anime they plan to watch or are currently watching through Express server API calls
- The app utilizes a public API to fetch anime data, via Axios calls, and employs modern web development technologies for the user interface and functionality

Chevron Phillips Chemical | Houston, TX   *October 2017-September 2023*

Process Operator
- Cultivated expertise in troubleshooting and adapting to various technologies such as MS Excel, Power BI, and ASPEN data tracking software to increase production by roughly 30%
- Collaborated with diverse teams and addressed complex issues, communicated via MS Teams, MS Outlook, and SAP management systems
- Reduced waste production and compliance issues, saving nearly 5 million dollars in legal fees and waste treatment
- Learned and mastered refinery unit software, FOXBORO automation and control systems
